PROFESSIONAL SUMMARY

- Full Stack & Web3 developer with 3 years of experience shipping production dApps and web applications across the MERN stack and EVM-compatible chains.
- Hands-on with Solidity smart contract development, wallet integration, and wiring React front-ends to on-chain logic via ethers.js and wagmi.
- Strong in REST API design, authentication and access control, and database modelling; writes clean, maintainable, well-tested code and ships reliable production features.

TECHNICAL SKILLS

Blockchain / Web3: Solidity, Smart Contracts, EVM Chains (Ethereum, Polygon), ethers.js, web3.js, wagmi / viem, Hardhat, MetaMask / WalletConnect, IPFS, ERC-20 / ERC-721 / ERC-1155

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Tooling: Git, GitHub, GitHub Actions, CI/CD Pipelines

BLOCKCHAIN PROJECTS

Privacy DEX — Privacy-Preserving Decentralized Exchange — Solidity · React · ethers.js · EVM

- Built a privacy-focused DEX for confidential token swaps on an EVM chain, hiding trade amounts and balances from public wallet addresses.
- Developed and tested Solidity contracts for swap/pool logic, wired to a React + ethers.js front-end with wallet connection.
- Designed the shielded-transaction layer so on-chain activity cannot be trivially linked back to a user's identity.

Rise Up — NFT Platform for Singers & Artists — Solidity · ERC-721 · React · IPFS

- Built an NFT platform letting singers mint music and artwork as NFTs and sell directly to fans, with on-chain resale royalties.
- Wrote ERC-721 smart contracts for minting, ownership transfer, and royalty distribution, deployed to an EVM-compatible network.
- Integrated wallet auth, IPFS media storage, and a React + Tailwind marketplace UI for browsing, minting, and purchasing.

PROFESSIONAL EXPERIENCE

Full Stack Developer

HimoTech Global, Noida · Sep 2025 – Present

- Built and shipped full-stack web apps and dApp interfaces with React.js, Next.js, Node.js, and MongoDB.
- Integrated Web3 wallet connections and on-chain interactions into React front-ends using ethers.js and wagmi.
- Developed RESTful APIs with Express.js, implementing JWT authentication and role-based access control.
- Built responsive, component-driven interfaces with React and Tailwind CSS, improving user engagement by 25%.

Junior Developer

HimoTech Global, Noida · Sep 2024 – Aug 2025

- Developed responsive web interfaces with React.js and Tailwind CSS, improving usability and consistency.
- Designed and integrated REST APIs connecting the frontend to MySQL and PostgreSQL backends.
- Built reusable UI components and improved frontend performance and maintainability.

Web Developer

HimoTech Global, Noida · Sep 2023 – Aug 2024

- Contributed to front-end development of internal tools using React.js, streamlining data-entry workflows.
- Maintained CI/CD pipelines with Git and GitHub Actions, reducing release time by 20%.
- Integrated third-party APIs (payment gateways, analytics), reducing manual processes by 30%.

KEY ACHIEVEMENTS

- Shipped two blockchain projects end to end — a privacy DEX and a music NFT platform — from contracts to UI.
- Drove a 25% increase in user engagement via responsive UI work; 20% faster releases through CI/CD automation.

EDUCATION

B.Tech, Computer Science Engineering

Manav Rachna University, Faridabad · 2023

Languages: English, Hindi
